Clinical Seminar

Foundation

Special Seminar on Neonatal Cardiovascular Topics

Autonomous University of Madrid, Spain
May 23-25th 2019

Objectives

IPOKRATES seminars provide high quality postgraduate education which enables professional to keep abreast of the most recent developments and offer participants the opportunity to discuss clinical problems or scientific issues personally with international experts. This seminar deals with neonatal and fetal hemodynamics. Circulatory insufficiency definition and treatment remain controversial in neonates as many determinants could be implicated. We will discuss some of the recent advances in objective assessment of cardiovascular well-being, including advanced functional echocardiography, 3D echocardiography and cardiac MRI in newborn infants.

Lecturers (alphabetic order)

María Carmen Bravo	La Paz University Hospital and Quironsalud University Hospital, Madrid, Spain
Willem de Boode	Radboud University, Nijmegen, The Netherlands
Lucía Deiros	La Paz University Hospital, Madrid, Spain
